

# CCTS

Name : Diya Goyal

Roll no. : CS20BTECH11014

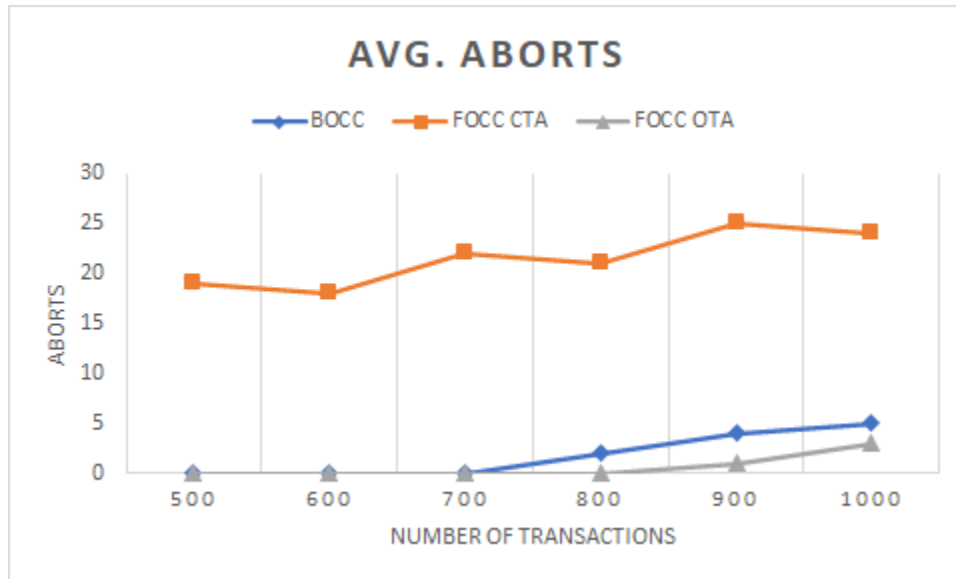

## Average Commit Delay:

As we can infer from the graph that Focc cta has the highest avg. commit delay. Bocc and Focc ota have kind of similar delays. This is due to the fact that the current transaction is aborted if any conflict arises in focc cta.

## Average Aborts

As we can see from the graph Focc cta has the highest number of aborts. The number is similar for Bocc and Focc ota.

Please see that for my code the focc cta was not working as expected for high number of threads due to some issue. Hence here the data is for 3 threads in focc cta but for the other 2 it is for 10 threads.
